

# CREATIVE LIVING

INSPIRED • EMPOWERED • INDEPENDENT

## WHO WE ARE...

Founded in 1974, Creative Living is a non-profit organization that provides affordable, wheelchair-accessible apartments and 24/7/365 support for adults with physical disabilities. Our two locations near Ohio State University allow 34 residents to live empowered, independent lives and pursue their passions.

## WHAT WE DO...

Creative Living was created to help residents achieve their goals while living on their own. We focus on making housing affordable and accessible for our residents, with a key part of our mission being the Resident Assistant Program. This unique program offers year-round, 24/7 non-medical support, giving residents peace of mind and covering the time when a personal care attendant is unavailable.

## WHY WE'RE UNIQUE...

Our residents face difficult challenges every day, whether they have lifelong conditions like cerebral palsy or spina bifida, or deal with permanent paralysis from spinal cord injuries. Despite these difficulties, they are students, workers, artists, gamers, animal lovers, athletes, decorators, craft enthusiasts, and some even have advanced degrees like Masters and Doctorates. *They are strong and inspiring, and while their dreams and physical challenges may differ, they all share a common drive to live life to the fullest – independently!*

That independence is supported through our Resident Assistant program, which provides help around the clock, every day of the year. Whether it's something small like helping with socks or everyday tasks like taking out the trash, our RAs provide non-medical support that might seem simple but is crucial to our residents. These gestures give them peace of mind, confidence, and security. With this support, they can focus on what truly matters to them: their loved ones, relationships, and personal interests.

Our mission is based on the belief that everyone deserves to be independent, no matter their physical limitations. *By providing accessible housing, full support services, and a supportive community, we change lives and help people live their lives to the fullest.*
